

Using the internet safely @ Buxlow

Technology is an important part of our world, from tablets & phones, cameras & speakers. They help us in lots of ways, but it is important that we think carefully about how to use them safely.

Tips to stay safe online!

Only use the Internet if an adult is in the room with you, and ask permission first!

Only use websites an adult has told you to use.

Don't tell people your name or where you live.

Tell an adult if you see or read anything you don't like & turn your screen off.

Put your name here if you will try to remember these tips when using your device at school and at home.
